With 35 years of experience and 1,600+ professionals across eight cities in India, we bring a passion for excellence and uphold the highest standards of reliability and transparency in every business engagement.

Introduction

Cyber Security & Data Privacy Services: Building Trust and Resilience for Customers

- **In today's interconnected digital economy**, cyber threats are no longer isolated incidents; they represent systemic risks that can impact brand reputation, business continuity, regulatory standing, and customer trust.
- **Attacks are growing in sophistication and frequency**, ranging from ransomware and phishing campaigns to insider threats, nation-state sponsored attacks, and supply chain vulnerabilities.
- **Many organizations still operate** under the dangerous belief that "it won't happen to us." In reality, every enterprise is a potential target, regardless of size or sector.
- **Beyond technology, weak governance**, human errors, and non-compliance are often the biggest vulnerabilities.
- **At Baker Tilly ASA India LLP**, our approach integrates:
 - **Proactive threat anticipation through risk** assessments and intelligence.
 - **Robust defences** combining controls, policies, and monitoring.
 - **Rapid incident response** to contain and recover.
 - **Regulatory alignment** with both Indian and international frameworks.
- **Our ultimate objective:** empower businesses to operate confidently and securely in a digital-first world.

Our Core Service Pillars

Digital Compliances & Cyber Audits

We help organizations achieve compliance with global standards like ISO 27001, ISO 27701, ISO 22301, and ISO 42001, as well as RBI, SEBI, and IRDAI mandates. Our services include ISMS design, ITGC reviews, vendor risk assessments, Aadhaar audit readiness, and continuous assurance to strengthen governance and reduce risks.

.....

Cyber Risk Assurance & Data Privacy

Our experts provide SOC 1 & 2 attestations and design privacy strategies aligned with DPDP, GDPR, HIPAA, and other regulations. Through Privacy Impact Assessments, PMS implementation, cross-border data reviews, and compliance training, we help organizations safeguard sensitive information and maintain regulatory confidence.

Digital Technology Management

We enhance application and infrastructure security through advanced testing, Red Teaming, and DevSecOps practices. With services including vulnerability management, dark web intelligence, phishing defense, and data loss prevention, we deliver measurable improvements in cyber resilience across the enterprise.

.....

Cyber Incident Response & Forensics

We provide rapid detection, containment, and recovery of cyber incidents through tailored playbooks, forensic investigations, and disaster recovery planning. Our approach ensures business continuity, equips leadership for crisis response, and strengthens resilience with simulations and post -incident reviews.
