

Baker Tilly Global Tax Solutions

Capability Statement

Now, for tomorrow

Seamless International Tax Coordination

We simplify global tax and accounting for multinational businesses. Acting as a single point of contact, we deliver tailored multinational tax solutions by leveraging the Baker Tilly International network's expertise.

Our approach ensures:

- **Centralised management:** A dedicated project lead drives efficient, hands-on project delivery.
- **Streamlined operations:** One global contract and the option of central invoicing, whilst ensuring zero tax leakage.
- **Strong relationships:** Short communication lines, consistent partner involvement, and rapid responses.
- **Client centric solutions:** Regular evaluations of client satisfaction and member firm performance, with follow-ups as required.

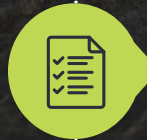

At Baker Tilly Global Tax Solutions, we create meaningful client experiences, solving challenges and unlocking opportunities with a solutions-first ethos.

Single contract with consistent global terms

Our Services

International tax

Mergers & acquisition

Corporate tax

Indirect tax

Transfer pricing

Complex year-end tax reporting

Tax and tech

Country by country reporting

Pillar 2 support

Our global profile

Case Study: A one stop shop solution for Global Tax Compliance

Working with the clients' teams across various regions, Baker Tilly GTS's coverage across various key locations was an exceptional advantage to the client and the Baker Tilly International Network, ensuring a smooth and efficient transition process.

The responsiveness of the GTS team and the strength of the Baker Tilly personal connections were the big differentiator, fostering a strong relationship built on trust over the past three years.

The client highlighted the significant benefits from GTS's centralised model, which ensured consistent accessibility and proactive support. As a result of the trusted relationship, GTS has assisted the client to further expand their collaborations with the Baker Tilly network to 31 countries, demonstrating the value of their integrated global approach.

Case Study: Urgent restructuring project

Baker Tilly Global Tax Solutions assisted a key client with an urgent restructuring of their European operations in preparation for the supply chain impact resulting from Brexit and the uncharted territory and uncertainties this brought to their operations.

There was a particular emphasis on the evolving trade and logistical requirements between the UK and multiple EU countries. To solve this critical business headache, the GTS team acted as the "central coordination hub" for a project to effectively communicate the client's key requirements and urgent needs with our local specialist colleagues across the network. This approach ensured that the advice provided on complex and evolving areas of tax legislation was timely, detailed, and consistent across the circa 15 countries.

Due to the urgency and importance of the project and the complexities arising from Brexit, we established a clear communication channel with all key stakeholders by holding regular touchpoint calls, providing daily project progression updates, and ensuring direct communication with our local teams to ensure optimum efficiency for all parties.

Case Study: Applying robotics to streamline tax accounting

Baker Tilly Global Tax Solutions assisted a Fortune 500 global client with its annual Tax Provision exercise across various entities globally within a short timeframe.

Following this exercise, we recommended process enhancements that aligned with the client's expectations. We later identified the potential to implement an RPA system within the process to improve the level of information gathered, resulting in a reduced time cost and lower risk of human errors while increasing the focus on reviewing and completing the returns on a timelier basis.

Due to the increase in the demand for such services, we believe that RPA tools are highly valuable assets, not only for the GTS team, but also for the global clients we serve within the Baker Tilly International Network.

The Baker Tilly Global Tax team are extremely proactive, keeping us informed of anything that could affect our business. They really understand the structure which is very complex, and their advice is always tailored and relevant. We very much view the Baker Tilly Global Tax team as our trusted advisor, and they treat us like we are their only client”.

**Finance Manager,
Global Oil & Gas Group**

The Baker Tilly Global Tax Solutions team are my go-to people, our conduit. They get it, get the deal, get the partnership, they add a lot of value. I was initially concerned that GTS were overselling, however, they have delivered on promises, and we have all been really pleased”.

**Director of Accounting,
Fortune 500 Group**

We chose Baker Tilly Global Tax Solutions as our European accounting and tax provider, even though we did not fully believe it was possible for the team to deliver on all that was promised during the proposal and pitch process. We have been surprised by the dedication of the team and the fact that all promises have been kept.”

**Senior Director, Finance Shared Services,
Global Fortune 500 Group**
